## **REDWEAR FABRICATIONS:**

**Microfiber:** This ultra soft luxury fabric is tightly woven from extremely fine filaments; it is naturally water repellent and wind-resistant. Amazingly, it is also breathable and moisture-wicking so that you stay dry and comfortable. Microfiber is one of the lightest weight, most comfortable and durable fabrics available.

**Micro Fleece:** Micro Fleece, made from microfiber, is brushed to compact the fabric and to build air pockets for insulation. Micro Fleece is wind-resistant, anti-pilling, quick-wicking, water repellent, lightweight, easy care, retains shape, and has a luxurious drape. Micro Fleece provides great warmth without having to be heavy weight.

**Bonded Fleece:** Bonded fleece combines the best of natural and high-tech fabrics. It has all the benefits of a Micro Fleece outer with the comfort of soft t-shirt material on the inside. This union of fabrics also allows for stylish color contrasting details. Great warmth and comfort without heavy weight or bulkiness.

**Bamboo Fiber and Bamboo Charcoal:** Bamboo fiber possesses important natural properties: it is anti-bacterial, anti-fungal, anti-static, and UV protective. The cross-section of the bamboo fiber is filled with micro gaps and holes to promote superior moisture absorption and ventilation. It absorbs and evaporates perspiration without sticking to skin. Because of its amazing natural properties, bamboo is a great alternative for sensitive skin. The fabric is incredibly soft, strong, durable and easy to care for; it can be washed, dried, and ironed like cotton.

The bamboo plant is 100% naturally grown without the use of pesticides or fertilizers, and is 100% Biodegradable and causes no harm to the environment. Because Bamboo is also the fastest growing plant in the world, it is considered sustainable and renewable.
